

TrafficPro

GEODI

AI based Traffic Sign
Inventory Management
Solution

What is TrafficPro?

GEODI TrafficPro automatically creates geographical traffic sign inventory using AI and Machine Learning. Reports new and missing signs by using videos.

How Inventory is Built?

Videos is the only input that is captured by vehicles that are routinely on the road. You may do this every day and detect a missing sign the day after.

Hardware Requirements?

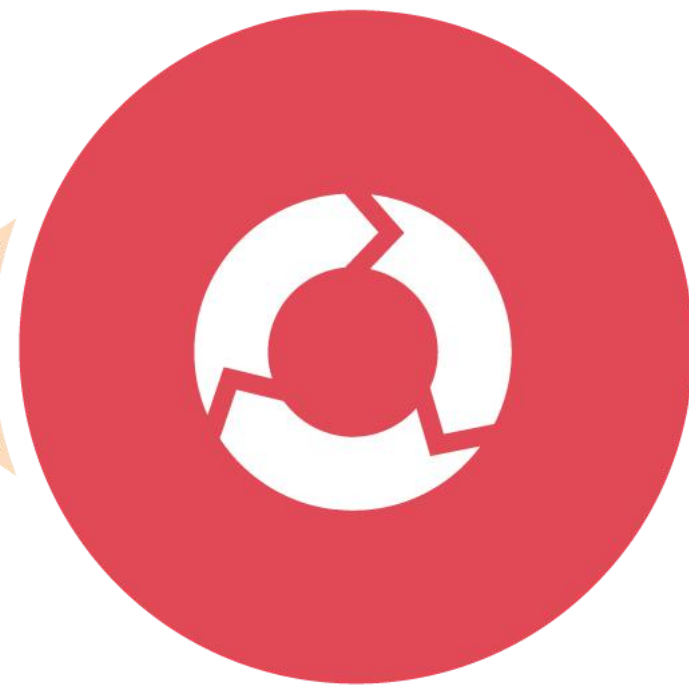

Car video recorders are fine.

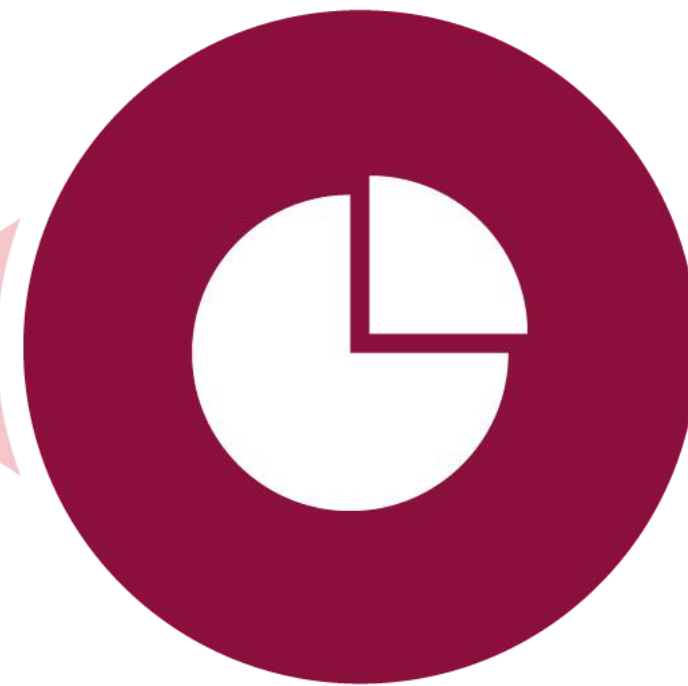

All automatic

Capture Data

Analyze

Report

GIS Integration

Inventory Management can be done on GEODI or other GIS solution like ArcGIS.

Other Possibilities

Detecting road problems or counting manholes are also possible with other GEODI solutions.

With Traffic Pro you can keep your road sign inventory up-to-date at all times, avoiding accidents caused by missing signs.
